Legacy Appoints William Dinardo as Business Development Manager

Mission KS, January 5, 2016. LTI, a major player in the glass-to-metal hermetic seal industry, specializing in telecom, aerospace, defense and medical applications has appointed William F. Dinardo to the new position of Business Development Manager. In making the announcement, LTI president, Bruce Diggett said, “Bill Dinardo brings us over twenty five years of sales, marketing and business development experience in electronic and ceramic packaging, biotechnology, RF and surface mount technology as well as microwave device manufacturing. His broad-based experience will bring depth to our management team and support for our new market and business development.”

Dinardo has served in senior management positions where he has directed sales, marketing, new product development, marketing research and new business development for glass-to-metal, ceramic packaging, advanced materials and microelectronic companies. Diggett comments, “Bill Dinardo is thoroughly qualified to direct our new business development and help us penetrate important new markets.”

Bill Dinardo graduated with a BS degree in Marketing and a Master degree in Business Administration from Southern New Hampshire University.

LTI operates a manufacturing facility totaling 33,000 sq. ft. in Mission KS. The LTI group includes its wholly owned subsidiary, Remtec Inc. of Norwood MA. Remtec provides custom and semi-custom packaging solutions for DC power electronics, optoelectronics and RF/MW products in commercial and military industries. www.remtec.com
